SHARE

Chakr Innovation has recently welcomed Indonesian policy expert and Asian Development Leader, Bambang Susantono, to showcase India's clean-tech solutions for controlling emissions. This collaboration shows India's commitment to fighting air pollution and marks an important step in strengthening India-Indonesia ties through knowledge sharing and policy discussions. Moreover, Susantono, former Chairman of Nusantara New Capital Authority, explored about Chakr Innovation's advanced solutions for environmental issues and engaged with key Indian leaders.

Sandeep Chakravorty, Indian Ambassador to Jakarta, highlighted the social and economic benefits of this visit and expressed hope for future partnerships to address shared environmental challenges. Amitabh Kant, former CEO of NITI Aayog, noted that India is becoming a "soft power" in climate action, with Indian startups leading impactful clean-tech innovations that reflect the country's cultural values and democratic spirit.

Sanjeev Bikchandani, founder of Info Edge, added that startups like Chakr Innovation are setting global standards with scalable and sustainable solutions for a cleaner future. Susantono welcomed the partnership, seeing it as a chance for both countries to lead in environmental care. Chakr Innovation's CEO, Kushagra Srivastava, stressed that such international collaborations are vital for expanding clean-tech solutions to other growing markets and supporting global sustainability goals.
