

Company Profile:

Chakr Innovation is a Series-B funded cleantech start-up founded by graduates from IIT Delhi. We aspire to be the most innovative and successful clean-tech company in the world and are working on multiple technologies to improve air quality and reduce the carbon emissions from various sources. One patented technology, that we have already commercialised, reduces particulate matter emissions from diesel engines. The technology is being used by 62 corporations across India including Coca-Cola, Toshiba, Kellogg's, Reliance Industries, Reckitt Benckiser, Asian Paints, Tata Group, Mahindra Group, Indian Army and many more. We are in the process of developing multiple other technologies in the cleantech sector and want to accelerate the world's transition to clean and carbon neutral technologies. We have grown from 2 founders to a team of over 250 full time employees and have set up our manufacturing and R&D unit in Pune. We currently have offices in Gurgaon and Chennai and are aggressively expanding to other geographies. We have also been recognised and awarded by multiple national and international institutions including Forbes 30 Under 30, United Nations, University of Chicago, American Society of Mechanical Engineers, General Atlantic, Niti Aayog and many more.
